

PHONO STAGES

Black Cube Phono

The Black Cube phono stage has gained cult status among vinyl oriented music lovers since it has hit the market in 1995. Countless positive reviews and awards and an absolutely unique customer satisfaction worldwide document this truly exceptional success.

PWX power supply

The PWX power supply upgrades every Black Cube standard to a Black Cube SE. Neutrik plug and modification manual are supplied. (qualified soldering needed).

Black Cube SE Phono

The Black Cube SE is equipped with the PWX power supply giving huge benefits sonically: much more bass authority, a more liquid midrange as well as more openness. These sonic benefits are without any doubt the reasons that more and more music lovers choose the Black Cube SE right from the start.

Black Cube Twin Phono

The true analog fan with two turntables or two tonearms on his deck can save serious money when choosing the Black Cube Twin. This unit delivers the same performance as two single Black Cubes SE at a considerably lower price. The Black Cube Twin comes with one PWX power supply and can be equipped with a second PWX on demand.

Silver Cube Phono

Sometimes dreams come true. **Lehmannaudio** phono stage have gained a legendary reputation for their sound and build quality. The Silver Cube is no different, pushing the boundaries still further. With the Silver Cube **Lehmannaudio's** efforts in terms of technology, electronic parts and mechanics have lead to high-energy sound reproduction with excellent technical data and holographic soundstage delivery. The Silver Cube has gained reference status in several hifi magazines and an overwhelming recognition as belonging to the ultimate in phono stage design.
